

Date:

Wednesday Challenge Form

Group Members: Max, Mason, and Justin

Problem Statement: We had to make a card House without bending the cards. Whoever Had the biggest house wins.

Approach: Make an inverted v-shaped Formation with one card on top.

Solution: The final house (3 stories) fell down and I made a tiny house out of two cards. We lost, but we weren't last place.

Lessons Learned: When making a card house, Patience is the most important thing to have.
