

Date:9/21/16

Wednesday Challenge Form

Group Members: Elizabeth, Carlos, and Robert

Problem Statement: We have to make a structure
As tall as we can using only pretzels, marshmallows
And graham crackers.

Approach: We had a cracker base, mallow
Adhesive, and pretzels to hold it all up.

Solution: The one that we got was not very hard to build. It
Required 8 marshmallows and 12 pretzels and no graham crackers
Were required. There were no instructions either because they didn't have time

Lessons Learned: Make the instructions clear for
The builder so they can make it they way you imagine
It.
