

Wednesday Challenge Form

Group Members: Half of the class

Problem Statement: Half the class had to use
Only their right hand to catch and pass a plastic
Pipe. First while sitting down, then when standing
Up, then finally passing it to the person two away from us

Approach: We sat down and had one person
say when to throw. Same with standing up.
For the last thing which is passing to the person
two away from you, we had one person turn around
And the other stay facing they way they are.

Solution: We won the Wednesday Challenge

Lessons Learned: steal peoples ideas I you
Don't have any. Then you will probably win
