

Wednesday Challenge Form

Group Members: Kirk the veteran

Problem Statement: We had to measure and Cut a cardboard piece into a 1 ft by 1ft square.

Approach: We measured with a protractor, a Ruler, and a pencil. Instead of using a box Cutter, we used an Exacto Knife.

Solution: We did okay, but I had to cut the square and it didn't work out very well so it is very un-evenly cut.

Lessons Learned: Measure twice, cut once
